Bioconductor Award **2023**

Certificate

Susan Holmes

For outstanding contributions to the Bioconductor project and community

Susan Holmes has been an active contributor to the Bioconductor project since the early days of the project. She provided excellent contributions to package development, supervision and training, diverse community building, and dissemination activities over a substantial period of time. Susan has inspired the next generation of researchers by supporting their active participation at all career levels and backgrounds, and demonstrated how the R/Bioconductor data science framework can be instrumental for developing and disseminating research that bridges the gap between modern applied statistics and real-world life science data. *Bioconductor says: thank you, Susan!*

Boston, 3 August 2023
