

The **contour** package*

Harald Harders
`h.harders@tu-bs.de`

File Date 2003/11/09, Printed November 9, 2003

Abstract

This package is based on an idea of Richard Pfeiffer (`richard.pfeiffer@t-online.de`). It generates a colored contour around a given text in order to enable printing text over a background without the need of a color box around the text.

1 Introduction

Sometimes it is necessary to print text over a background that is not pure white, e.g., in gnuplot plots. It is not always wished to plot the text in a rectangular box since this can cover important information or look poor. This package provides a solution to cover less space with the text and ensure readable text in the same time.

*This file has version v1.04 last revised 2003/11/09.

The used technique is quite simple. In a circle around the original text position the same text is printed evenly distributed 16 or 32 times. The default radius for the circle is 0.03 em.

2 User interface

To use this package place

```
\usepackage{contour}
```

in the preamble of your document. No options are necessary.

The package provides the commands

```
\contour{<color>}{<text>} and  
\contour*{<color>}{<text>}
```

which produce the text `<text>` with a colored contour around. The `*` variant makes 32 instead of 16 copies.

The radius of the circle (= thickness of the contour) can be changed using the command `\contourlength{<length>}`, where `<length>` is a length understood by L^AT_EX. The length is not expanded when defining the contour length but when using it. For example when using `0.05em`, 0.05 em of the font used in the command `\contour` are used.

3 Example

The command

```
\colorbox{black}{This text is not visible} \contour{yellow}{but this is}  
produces:
```

but this is

Another example is shown in figure 1.

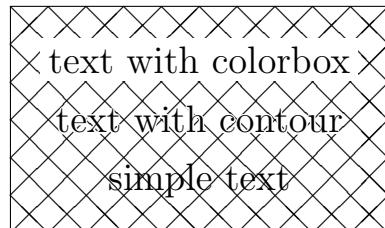

Figure 1: Comparison of the commands `\colorbox{white}{<text>}` and `\contour{<text>}`

In figure 2, you can see the looking of the output depending on the number of copies.

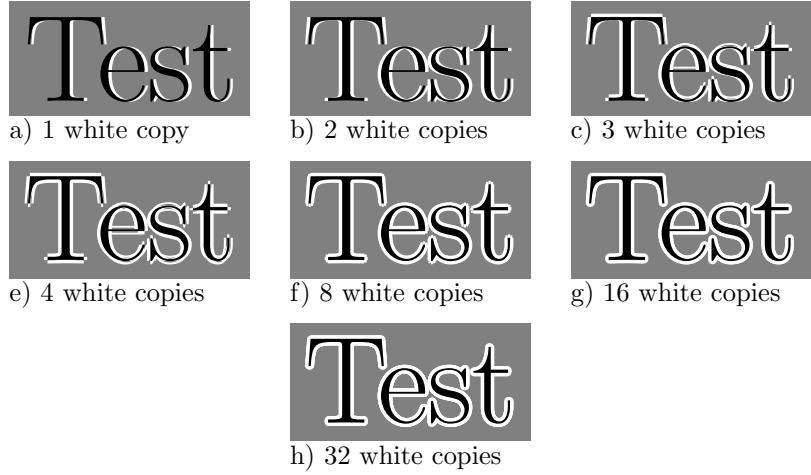

Figure 2: Looking of the contour with different numbers of copies

4 The implementation

Heading of the package:

```
1 \NeedsTeXFormat{LaTeX2e}
2 \ProvidesPackage{contour}
3 [2003/11/09 v1.04 Print contoured text]
```

This package requires the color package from the graphics bundle:

```
4 \RequirePackage{color}
```

Set text to a specified relative position without using space:

```
5 \newcommand{\con@put}[3]{\makebox[0pt][l]{\hspace*{#1}\raisebox{#2}[0pt]{#3}}}
```

Rename \color command to con@color. This is down in order to prevent the background text color from being changed:

```
6 \def\con@off{\let\con@color=\color%
7 \def\color##1##2##2}{}}
```

Restor color command:

```
8 \def\con@on{\let\color=\con@color}
```

\contourlength Define the commands for changing the base length:

```
9 \newcommand{\contourlength}[1]{\def\contourbaseheight{#1}}
10 \contourlength{0.03em}
```

Define new offset length:

```
11 \newlength{\con@length}
```

\contour The new macro for producing text with a white contour.

Devide between a normal and a star version.

```
12 \newcommand{\contour}{\@ifstar{\@contour[*]}{\@contour}}
```

The command itself. The optional parameter is used for the star version `\contour*`.

```
13 \newcommand{\@contour}[3][\emptyset]{%
```

Specifiing the offset length relative to the text size

```
14 \setlength{\con@length}{\contourbase@length} %
```

Put the text many times around the current text position.

$0^\circ, 90^\circ, 180^\circ$ and 270° :

```
15 \con@put{1\con@length}{0\con@length}{\color{#2}\con@off#3\con@on}%
16 \con@put{-1\con@length}{0\con@length}{\color{#2}\con@off#3\con@on}%
17 \con@put{0\con@length}{1\con@length}{\color{#2}\con@off#3\con@on}%
18 \con@put{0\con@length}{-1\con@length}{\color{#2}\con@off#3\con@on}%
```

$45^\circ, 135^\circ, 225^\circ$ and 315° :

```
19 \con@put{0.707\con@length}{0.707\con@length}{\color{#2}\con@off#3\con@on}%
20 \con@put{0.707\con@length}{-0.707\con@length}{\color{#2}\con@off#3\con@on}%
21 \con@put{-0.707\con@length}{0.707\con@length}{\color{#2}\con@off#3\con@on}%
22 \con@put{-0.707\con@length}{-0.707\con@length}{\color{#2}\con@off#3\con@on}%
```

$22.5^\circ, 67.5^\circ, 112.5^\circ, 157.5^\circ \dots$:

```
23 \con@put{0.383\con@length}{0.924\con@length}{\color{#2}\con@off#3\con@on}%
24 \con@put{0.383\con@length}{-0.924\con@length}{\color{#2}\con@off#3\con@on}%
25 \con@put{-0.383\con@length}{0.924\con@length}{\color{#2}\con@off#3\con@on}%
26 \con@put{-0.383\con@length}{-0.924\con@length}{\color{#2}\con@off#3\con@on}%
27 \con@put{0.924\con@length}{0.383\con@length}{\color{#2}\con@off#3\con@on}%
28 \con@put{0.924\con@length}{-0.383\con@length}{\color{#2}\con@off#3\con@on}%
29 \con@put{-0.924\con@length}{0.383\con@length}{\color{#2}\con@off#3\con@on}%
30 \con@put{-0.924\con@length}{-0.383\con@length}{\color{#2}\con@off#3\con@on}%
```

$11.25^\circ, 33.75^\circ, 56.25^\circ \dots$:

```
31 %
```

```
32 \ifx#1\empty%
```

```
33 \else%
```

```
34 \con@put{0.195\con@length}{0.981\con@length}{\color{#2}\con@off#3\con@on}%
35 \con@put{0.195\con@length}{-0.981\con@length}{\color{#2}\con@off#3\con@on}%
36 \con@put{-0.195\con@length}{0.981\con@length}{\color{#2}\con@off#3\con@on}%
37 \con@put{-0.195\con@length}{-0.981\con@length}{\color{#2}\con@off#3\con@on}%
38 \con@put{0.981\con@length}{0.195\con@length}{\color{#2}\con@off#3\con@on}%
39 \con@put{0.981\con@length}{-0.195\con@length}{\color{#2}\con@off#3\con@on}%
40 \con@put{-0.981\con@length}{0.195\con@length}{\color{#2}\con@off#3\con@on}%
41 \con@put{-0.981\con@length}{-0.195\con@length}{\color{#2}\con@off#3\con@on}%
42 \con@put{0.556\con@length}{0.831\con@length}{\color{#2}\con@off#3\con@on}%
43 \con@put{0.556\con@length}{-0.831\con@length}{\color{#2}\con@off#3\con@on}%
44 \con@put{-0.556\con@length}{0.831\con@length}{\color{#2}\con@off#3\con@on}%
45 \con@put{-0.556\con@length}{-0.831\con@length}{\color{#2}\con@off#3\con@on}%
46 \con@put{0.831\con@length}{0.556\con@length}{\color{#2}\con@off#3\con@on}%
47 \con@put{0.831\con@length}{-0.556\con@length}{\color{#2}\con@off#3\con@on}%
48 \con@put{-0.831\con@length}{0.556\con@length}{\color{#2}\con@off#3\con@on}%
49 \con@put{-0.831\con@length}{-0.556\con@length}{\color{#2}\con@off#3\con@on}%
```

```
50 \fi%
```

```
51 %
```

Print the normal text:

```
52 \makebox[\width][l]{#3}%
53 }
```

Change History

1.04	\contour: Avoid line break of inner text	5
General: Avoide usage of \textversion etc.	3	

Index

Numbers written in italic refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in roman refer to the code lines where the entry is used.
